

Please do not change the law banning telemarketers from calling residences. It has been so peaceful and quiet during dinner hours that we can actually eat dinner and have conversation without being interrupted by an unwanted phone call. I felt that I was subject to my phone as I was always wary about answering phone calls not knowing if it was someone I wanted to talk to or not. therefore, I would let the answering machine pick it up and then return the calls I wanted to return. A total waste of time and a major inconvenience. I just reiterate, please do not change this law back to what it was before. If anything, it should be tougher, not more lenient. Thank you
